SUMMARY

Full-stack developer with hands-on experience building and deploying production-ready web applications using Next.js, TypeScript, Node.js, Express, and MongoDB. Strong in authentication systems, protected routes, REST API design, and end-to-end ownership from UI to cloud deployment.

TECHNICAL SKILLS

- Frontend: Next.js, React.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS
- Backend: Node.js, Express.js, REST APIs
- Database: MongoDB, Mongoose
- Tools: Git, GitHub, Postman
- Languages: JavaScript, TypeScript, C++, Python

PROJECTS

Brevis: Privacy-First Full-Stack Web Application Link

- Built a full-stack web application using Next.js, TypeScript, Node.js, Express, and MongoDB with end-to-end ownership from UI to deployment.
- Implemented JWT-based authentication with cookies, bcrypt password hashing, and protected routes via Next.js middleware.
- Designed REST APIs with modular controllers and MongoDB (Mongoose) schemas for users, thoughts, messages, and feedback.
- Deployed frontend on Vercel and backend on Render with environment-based configuration and CORS setup.

Tech: Next.js, TypeScript, Tailwind CSS, Node.js, Express, MongoDB, JWT, Vercel, Render

Trusto: Workflow-Driven Task Management Platform Link

- Built a full-stack platform to manage paperwork, official documentation, and government-related tasks through guided workflows.
- Designed multi-step task flows with user authentication, role-based access, and document verification.
- Optimized workflows to reduce task completion steps by ~30%, improving usability for senior citizens and working professionals.

Tech: React.js, Node.js, Express.js, MongoDB

CERTIFICATE

- Introduction to Generative AI – Google Cloud

EDUCATION

- B.Tech – Computer Engineering 2027
